Installer allows you to create disk images containing applications that can be used directly or redistributed to other PCs or the Web. It also allows you to create bootable disks, and burn ISO files. File Splitter is a utility for splitting a file or a multiple files into multiple files. It can also merge multiple files into one file. You can also combine files into one folder. Image Color Editor is an all-in-one easy-to-use, yet powerful, RAW image editor that provides an intuitive editing experience. Whether you're an amateur or a professional, or you're a beginning, intermediate or advanced user, Image Color Editor will meet all of your image editing needs! The resulting colors of the original object have a slight tint as though some diffraction happened. It makes the object more transparent. - Hair styles now include volume and a slight glimmer. - Hair can now easily be cut. - New curl options added. - Many fixes and improvements. This utility classifies pixels in an image into one of two colors: the original object color and the background color. It's also a powerful tool for editing images, and for retrieving the original color from a color image. It is an easy to use image application which offers the following capabilities: -Warp preview function allows warping of an image taken in 3D mode while still holding the original size of the image. -Rotates an image while holding the original size of the image. -Scans an image in a

What's New in the CamOnWeb?

CamOnWeb is a webcam application designed to capture the webcam and send it over the Internet. The purpose of this application is to capture images and video from the webcam and then send it over the Internet in any http(s) address. CamonWeb provides a simple interface to capture the webcam and display it in your browser. To capture images, you must go to the menu and select "Take picture". And then you must select one of your available camera (you can only choose one). After you are done with your task, click on the button "Submit" to send your images to any web address. Installation: To install CamOnWeb in your Windows: 1- Go to www.camonwebbot.com and register. 2- Once you receive an email with a link, click the link to install. To install CamOnWeb in your Mac: 1- Go to www.camonwebbot.com and register. 2- Once you receive an email with a link, click the link to install. 3- Run the install file and follow the instructions to install.
